

Maatsuyker Island Volunteer Caretaker and Weather Observer Program Information Package

Introduction

This package is designed to provide prospective applicants with information on the Maatsuyker Island Volunteer Caretaker Program (including paid weather observing duties). It covers the positions on the island for the period February 2014 until February 2015.

About Maatsuyker Island

Maatsuyker Island is an island of around 180 hectares located approximately 10 kilometres off the remote south west coast of Tasmania. The island has a rugged, steep and rocky coastline and, apart from the areas cleared for the lighthouse station, is covered by dense, scrubby vegetation. The weather is frequently cold, wet and very windy.

A lighthouse tower, light keepers' houses and outbuildings were built on the island in 1891 and operated until 1997 when the original light was decommissioned and replaced with an automatic beacon.

Apart from the heritage values of the light station, Maatsuyker Island has significant natural values primarily as a habitat for breeding seabirds and seals. It is also a site of importance to the Tasmanian Aboriginal community.

The Parks and Wildlife Service (PWS) manage Maatsuyker Island as part of the Southwest National Park and Tasmanian Wilderness World Heritage Area. A permanent presence is maintained on the island through the Maatsuyker Island Volunteer Caretaker Program. The **WILDCARE** group 'Friends of Maatsuyker Island' works in partnership with PWS on many aspects of island management.

Access to the island has traditionally been only by boat, but today helicopters have almost totally taken over this role. All visitors, including PWS staff and volunteers, must be self-sufficient for the duration of their stay in this remote area with limited facilities and where weather dictates much of the day-to-day activities including helicopter flights to and from the island.

Infrastructure on the island includes the original light tower, 3 substantial ex-light keepers' houses, numerous smaller outbuildings including a meteorological observation office, communications towers, roads, tracks and a helipad.

Maatsuyker Island Volunteer Caretaker Program

About the position

The Maatsuyker Island Volunteer Caretaker Program is designed to provide a permanent presence in this remote location. Participants provide caretaking services for the Parks and Wildlife Service including basic land management work, maintenance of buildings, plant and equipment, and at the same time carry out weather observations for the Bureau of Meteorology for which they receive payment. Separate contracts are entered into for each of these two duties.

Further details of the position are provided in the attached Statement of Duties.

Participants are required to live on the island continuously for periods of 6 months (minimum 4 months) or more. Due to the isolation and remoteness of Maatsuyker Island, and the safety implications, a minimum of two adults who can demonstrate they have spent time together in a remote setting, must be on the island. It is important that the people who are on Maatsuyker at the same time are able to work well together. Accordingly, submissions from people with an established relationship are much preferred. While most participants are couples we will consider Individuals applying together or families.

In addition to the period on the island, participants will be required to take part in a training program in Hobart of approximately 2 weeks before leaving for the island. This training is run jointly by the Parks and Wildlife Service and the Bureau of Meteorology.

All packing of food and personal items needs to be complete prior to the 2 weeks of training

In order to maintain the principles and practice of Occupational Health and Safety, all persons selected for a caretakers position will be required to attend a medical and dental assessment prior to appointment, and have a current 1st Aid certificate, clearance from Dentist and a police check related to being responsible for significant cultural heritage site.

Maatsuyker Island Facilities and Services

Participants will be provided with helicopter transport to the Island at the start of their term, and from the Island on completion. Evacuations for emergency (eg medical) reasons will also be provided.

One of the ex-light keepers' houses (Q1) will be available for the sole use of volunteer caretakers. On rare occasions other staff may share this house but casual visitors including PWS staff, contractors and other volunteers are normally accommodated in a second house (Q2) or (Q3).

Q1 is a substantial well maintained brick house with four bedrooms, kitchen, living room, bathroom and storage with basic furniture suitable for up to eight people. This includes beds, mattresses, table and chairs, refrigerator with a small freezer, gas stove and oven, microwave, basic cutlery, crockery, basic pots and pans, electric washing machine, VHF and HF radios and telephone. Space heating is limited to one small fan heater. There is no television or internet available on Maatsuyker Island, although it is possible to watch DVD's on the computer supplied or your own laptop.

Participants are responsible for providing their own food, clothing, entertainment, bedding and other personal items. The Parks and Wildlife Service will provide transport by helicopter for these items between Hobart and Maatsuyker Island. Transport space is limited to approximately 350 kg per person,(for 6 month stay) .

The Parks and Wildlife Service will also provide one resupply helicopter visit at approximately 3 months in (ie one resupply in the standard 6 month stay), often to coincide with scheduled or unplanned maintenance. Space on the resupply flight will be limited. Caretakers generally make their own arrangements for the preparation of food and other goods for resupply. Please note PWS is interested in people taking as many of the supplies as possible onto Maatsuyker in the beginning, so that the resupply can be primarily for fresh food and mail. In addition caretakers are able to utilize the vegetable garden for fresh food.

Electricity is supplied to the light station, including all houses, by a generating system incorporating diesel, solar. The high cost of transport dictates that gas and diesel consumption on the island be kept to a minimum.

Basic tools and spare parts are provided for routine maintenance.

(Note: All houses have asbestos roofing and some buildings have asbestos walls. All drinking water is filtered and asbestos presents minimal hazard to visitors)

Submitting an Application

In order to be considered for the Maatsuyker Island Volunteer Caretaker Program interested persons should submit an application addressing the selection criteria listed in the attached Statement of Duties.

Application from couples or groups or a family where members are known to each other are required.

Note: that each person of the couple or group **must complete a separate application.**

Applications should be forwarded to: **(one application from each person)**

Pip Gowen
Parks and Wildlife Service
22 Main Street
HUONVILLE TAS 7109

By email: pip.gowen@parks.tas.gov.au

To arrive by **9.00am Monday 12 August 2013**

Each application should include a completed **Maatsuyker Island Volunteer Caretaker and Weather Observer – Application Summary Form (1 for each person)**

See incl. in this package.

Applicants will be assessed according to how well they have addressed the selection criteria and may be invited to an **interview in Hobart on 9 or 10 or 11 Sept 2013** (see timetable in information package).

Successful applicants will then be offered a block of time on the island for 6 months (or possibly 4 months? – preference will be given to an appropriate candidate for 6 months).

Participation in the program will then further depend on the applicants:

1. Obtaining essential qualifications (radio licence, first aid certificate, drivers licence),
2. Passing medical (incl. physical & psychological), dental examinations and police check
3. Successful completion of the two week training/induction program in Hobart.

Application Timetable

The following application timetable has been adopted for the selection of volunteer caretakers for Feb 2014 to Feb 2015.

Sat 20 July 2013	Advertisement appears in local newspapers/websites
Mon 12 Aug 2013	Applications close by 9.00am @ pip.gowen@parks.tas.gov.au
Fri 23 Aug 2013	Notification of short listing for interviews
9/10/11 Sept 2013	Interviews, Lands Building L2 , MacQuarie St Hobart - Rm TBA
Fri 20 Sept 2013	Successful applicants advised - (email from candidate accept)
Fri 27 Sept 2013	Unsuccessful applicants advised

- * **Notes:** 1. Applicants may apply for up to 6 months on Maatsuyker Island
2. Training/induction period required prior to this period on the island.

Any enquiries relating to this application process should be directed to:

Maatsuyker Island Volunteer Caretaker and Weather Observer Program Statement of Duties

Job Title

1. Maatsuyker Island Volunteer Caretaker
2. Maatsuyker Island Weather Observer

Employing Division

1. Parks and Wildlife Service, Southern Region
2. Bureau of Meteorology, Tas/Antarctic region

Location

Maatsuyker Island

Employment Conditions

4-6 months, Volunteer Caretaker, paid Weather Observer. Weather observations are currently taken each day at 6am, 9am and 3pm for which the payment is **approximately** \$13,000 per annum. (To be confirmed by BOM for 2014 – 2015)

Supervisors

1. Ranger in Charge Huonville Field Centre **and** Regional Volunteer Facilitator (South) (parks and Wildlife Service)
2. Regional Observations Manager (BOM)

Position Objectives

1. Volunteer Caretaker: To assist in the protection and conservation of the natural and cultural heritage values of Maatsuyker Island. Provide assistance to visitors to the Island and Parks and Wildlife Service staff as required.
2. Weather Observer: To conduct accurate and timely weather observations and provide reports on these observations to the Bureau of Meteorology.

Major Duties

Volunteer Caretaker

1. Carry out basic land management duties such as onground works eg mowing and brushcutting, drain clearing, painting, fire prevention tasks as instructed.
2. Implement cyclic maintenance programs to conserve buildings and structures as instructed. (e.g wiping of all walls in the buildings to clear mould and opening of all windows regularly, weather permitting, to minimize mould growth)
3. Monitor and report on any perceived threats to natural and cultural values, and report on the condition of items of natural or cultural value as requested.
4. Assist with the maintenance of management facilities, equipment and buildings including: fire fighting equipment; communication system; diesel generators and associated electrical, fuel and water systems; helicopter pad; workshop, tools and equipment; roads and tracks between buildings as instructed. Complete detailed inventories for resupply.
5. Maintain an acceptable record of tasks carried out on Maatsuyker Island as instructed.
6. Operate and maintain departmental vehicles and plant and machinery in accordance with departmental policies.
7. Assist and advise visitors as instructed.
8. Assist PWS staff with other duties as requested.
9. Perform all duties in accordance with any departmental occupational health and safety guidelines, and in accordance with your level of competency.
10. Maintain 2 way communication with PWS to ensure the ongoing management of site and the volunteer/weather observation programs.

Weather Observer

1. Use and maintain meteorological equipment.
2. Determine visibility, weather phenomena, sea and swell conditions. (3 times every day)
3. Identify cloud types, amounts and heights
4. Maintain accurate records and encode and transmit data via a personal computer interfacing with an automatic weather station (training will be provided).
5. Provide accurate and timely daily reports. (6am, 9am & 3pm)

Direction / Supervision Received

Caretakers/weather observers work unsupervised on Maatsuyker Island under guidelines provided by the Parks and Wildlife Service and Bureau of Meteorology. Training for this position includes a 3 day PWS induction program and 3 day BOM training program, in Hobart before departing for the island. Then a one week training program with PWS staff on the island.

Knowledge and skills (selection criteria): (In your application: address each criterion separately)

1. Demonstrated experience living and working for extended periods (4-6 months) in a remote, isolated, and climatically challenging location with limited outside support.
2. Demonstrated broad range of practical skills (not necessarily trade level skills) appropriate to the range of tasks required on Maatsuyker Island and the ability to safely carry out land management and maintenance works according to departmental standards. Knowledge and skills in small motor maintenance/trouble shooting, diesel generator routine servicing and fault finding and building maintenance would be an advantage.
3. A basic understanding of the principles of managing land for the conservation of natural and cultural values, and for the provision of tourism and recreation opportunities, together with knowledge and appreciation of natural and cultural values of Maatsuyker Island, or the ability to quickly acquire these. Including a knowledge of the Burra Charter and including knowledge of Bio Security requirements.
4. High level of motivation, with the ability to adapt to challenging new situations and maintain productivity and motivation under difficult circumstances.
5. Background or interest in meteorology, or relevant maritime or aviation experience and an understanding of the significance of the Meteorological Observation Program.
6. A basic understanding of desktop computing programs and their operation sufficient to manage day to day works reporting and weather observations.
7. Capacity to operate VHF/HF radio equipment or ability to quickly acquire this skill.
8. Ability to effectively participate as part of a team including the ability to live at close quarters, assist with search and rescue operations and fire management activities.
9. Demonstrated experience managing safety/OHS in a remote settings.
10. Demonstrated physical and mental fitness to maintain a healthy attitude to remote work in challenging setting with one other person for extended periods of time.

Essential Qualification and Requirements (add copies of 1-3 to your application if available) – scanned copies acceptable

1. Marine Radio Operators Certificate of Proficiency
2. First Aid Certificate (Workplace level 2)
3. Drivers license
4. Physically and mentally fit, capable of carrying out strenuous and ongoing work in a remote and physically challenging environment.

Note: Training for First Aid and Radio Operators certificates can be undertaken after selection and before departing for Maatsuyker Island. All participants must pass a

medical and dental examination immediately prior to commencing work on the island. Do not include medical information with your original application.

Work Environment

The Department of Primary Industry Parks Water and Environment (DPIPWE) is committed to high standards of performance in relation to Occupational Health and Safety and Diversity Management. All employees (including volunteers) are expected to participate in maintaining safe working conditions and practice, promote and uphold the principles of fair and equitable access to employment/promotion, personal development and training and the elimination of workplace harassment and discrimination. The department is a smoke-free environment.

The working environment in the Department of Primary Industry Parks water and Environment is governed by:

State Service Principles

The State Service Principles (the Principles) are contained in section 7(1) of the *State Service Act 2000*. Section 8 of the Act requires Heads of Agency to uphold, promote and comply with the Principles and section 9(13) of the Act requires employees to behave at all times in a way that upholds the Principles.

The Principles are a core element of the State Service and represent the minimum responsibilities of officers and employees. Employees should familiarise themselves with the Principles and must work to ensure the Principles are embedded into the culture of the Agency and that the Principles are applied to all Agency decision-making and activities.

Code of Conduct

The State Service Code of Conduct (the Code) is contained in section 9 of the *State Service Act 2000*. It complements the State Service Principles and requires employees and officers to act appropriately in the course of their duties and to maintain the confidence of the community in the activities of the State Service. The Secretary of the Department of Primary Industry Parks Water and Environment has legislative authority to investigate an allegation of a breach of the Code and to impose a sanction where a breach has been determined.

The *State Service Act 2000* and the Commissioner's Directions can be found on the State Service Commissioner's web site at <http://www.osscc.tas.gov.au>.

The Department's values, as expressed through its strategic planning process and Leadership Charter, also describe the expected behaviours of employees and managers within the workplace.
