

Entry for Airservices Australia En Route Supplement 28 June 2012

FN18 – Freycinet Peninsula

Areas Affected by the Fly Neighbourly Advice (FNA)

1.0 The Reserves

Administered by the Tasmanian Government' Parks and Wildlife Service (PWS), the area includes Freycinet National Park, Coles Bay Conservation Area and Moulting Lagoon Game Reserve. Apsley Marshes which adjoins the Moulting Lagoon Game Reserve is private property.

1.1 Ramsar Sites

Moulting Lagoon Game Reserve and Apsley Marshes are both designated Ramsar sites.

1.2 Sensitive Environmental Areas (SEAs) associated with 1.0 and 1.1 above.

There are many SEAs due to the presence of wedge-tailed eagle and white-bellied sea-eagle nest sites, seabird, shorebird and water fowl breeding, feeding and roosting sites as well as seal haul-out areas.

2.0 Preferred Altitudes and Operation

The preferred minimum over-flight altitude for the Reserves and the Ramsar sites is 1,500FT above the ground or water.

The recommended over-flight altitude of the SEAs (at the centre of the SEA) is 3000FT above ground or water. See the PWS web site for details.

It is preferred that aircraft operate off-shore as much as possible, at the highest possible altitude and greatest lateral distance from features of scenic interest

3.0 Landing

Except in an emergency, no flight is permitted to land at any location within

- the Reserves without approval from the PWS; or
- the Apsley Marshes Ramsar site without approval of the land owner.

Further information is available in the full version of the FNA on the PWS website.

All pilots operating in the affected areas are requested to adhere with the FNA.
