

LEGEND

Vegetation within Reserves

-  Rehabilitation Area
-  Wetland
-  Eucalyptus amygdalina heathy forest on sandstone
-  Closed-heath
-  Grassland
-  Open-heath
-  Sedgeland
-  Eucalyptus amygdalina, E. viminalis, E. obliqua shrubby forest
-  Impoundment
-  Eucalyptus amygdalina heathy coastal forest/woodland
-  Eucalyptus ovata shrubby forest
-  Agriculture and Miscellaneous

Known Locations of Species with Conservation Status

-  Threatened Fauna
-  Threatened Flora

Note: Vegetation within the Reserves is site specific, mapped by Kirkpatrick and McQuillan (1996).

Vegetation that falls outside of the Reserves is derived from the 1:25000 TasVeg mapping layer.

IMPORTANT INFORMATION

- Operations surrounding sites of natural and cultural heritage should be in consultation with the PWS Derwent Senior Ranger.
- Use of heavy machinery in the Reserves requires permission from the PWS Derwent Senior Ranger or delegate.
- The Forty-spotted Pardalote is found in E. viminalis habitat along Coffee Creek.
- Gahnia radula along Howden Fire Trail is important habitat for Chaostola skipper.
